

PRESS RELEASE

10 July 2018

Total Composite Solutions (TCS) and Microtex announce exclusive long term supply agreement for the Americas

Total Composite Solutions (TCS) and Microtex Composites Srl are pleased to announce an extension of their existing exclusive UK and Ireland agreement into the Americas. TCS will initially offer Microtex advanced prepreg systems into this growing regional market sector, followed by their premier weaving product range.

Andrew Pointon, Managing Director of TCS states, “Building on the success of our solutions-based business model in the UK regions, we will be offering the same level of expertise to the American markets, along with local stock for fast efficient delivery. Microtex strong R&D culture and market leading products, aligned with our service proposal and capability will add real value to the Americas.”

Massimo Becagli, CEO of Microtex comments, “This agreement is a natural progression in our strategic relationship with TCS to fill the American commercial gap. We are delighted with their success in the UK market and believe this exclusive arrangement seeks to strengthen our positions as world class providers.”

To discuss any of your requirements covering the Americas region please email sales@totalcompositesolutions.com or call +44 (0)2392 459513.

About Total Composite Solutions Ltd:

Total Composites Solutions (TCS) is an advanced composite solutions company focusing on providing its customers and partners with market development, technical and engineering support along with optimised products within the advanced Resin, Adhesives, Fibre and Prepreg markets.

About Microtex Composites Srl:

Microtex Composites manufactures a comprehensive range of advanced composite resins, fibre and prepregs paying much attention to the technical development and customization of its products. With the mission of offering the best service on the market, both from a technical and esthetical point of view, the company is born as an ambitious project in which investments, research and technology are not only the key to obtaining success in production, but also represent a philosophy of development that focuses on Customer’s needs and concerns.
